

BSN Program Student Learning Outcomes

1. Critical Thinking
SLO BSN: Integrate reliable evidence from multiple perspectives to inform safe nursing practice and make reasonable clinical decisions.
2. Holism
SLO BSN: Synthesize knowledge from nursing and a liberal education in the planning and provision of holistic nursing care across the lifespan and continuum of health care environments.
3. Nursing Process and Safety
SLO BSN: Employ the nursing process and patient care technologies and information systems to support safe nursing practice.
4. Communication
SLO BSN: Utilize interpersonal and interprofessional communication in collaboration for the promotion of optimal health for individuals, families, communities, and populations.
5. Ethics
SLO BSN: Apply ethical and legal standards of professional nursing including professional accountability and responsibility in the provision of professional nursing care.
6. Advocacy and Leadership
SLO BSN: Integrate leadership and management skills, and knowledge of health care policy, regulatory processes, and cost effectiveness for the improvement of quality care and patient safety.
7. Education and Health Promotion
SLO BSN: Incorporate principles of health education, promotion, and disease prevention in the professional nursing care of individuals, families, communities, and populations.
8. Respectful Care
SLO BSN: Value caring, respect, dignity, hope, and the human spirit in the provision of professional nursing care.
